Work Experience

Business Data Analyst

Telesis, Inc. February 2015 to March 2016

- Designed and created interactive reporting tools to drive performance and financial goals.
- Utilized Visual Basic for Applications (VBA) to create dynamic excel reports.
- Wrote SQL statements with SQL Server Management Studio.
- Worked with all business areas to develop a project's scope and requirements.
- Maintained a portfolio of reports, ensuring updated and accurate information.
- Managed multiple projects while keeping clear communications with all parties involved.

Commercial Mortgage Loan Analyst

Ameritas Investment Partners June 2011 to January 2015

- Underwrote mortgage loan investments from a national network of mortgage banking correspondents. Interacted with these correspondents on issues relating to individual transactions, resulting in many solid business relationships.
- Developed knowledge of a variety of commercial property types and real estate markets.
- Prepared and negotiated loan structures based on lender appetite, borrower needs and risk mitigation.
- Communicated clearly with all parties to the mortgage to keep loan commitments moving through the origination process.
- On a quarterly basis, provided exposure reports on a portfolio of \$1.2 billion of commercial mortgage loans.
- Supported the production of 45 loans totaling \$75 million in 2014 and 31 loans totaling \$64 million in 2013.

Projects

Throughout my coursework at the Star City Code School I have undertaken several personally driven projects to learn a myriad of different web technologies. These include the Ruby on Rails framework, the MVC web architecture, HTML/CSS, Javascript/jQuery, Ajax, user authentication, Amazon Web Services S3, file uploading and much more. The following link provides my project portfolio site with links to pertinent GitHub repositories and Deployed projects.
